Professional Summary

Recent interest in personal career development has driven me to begin my search for a position in the software development industry. My education has, for the most part, revolved around the different areas of business, as well as critical thinking and thought-challenging problems. Recognized in economic theory, being awarded the 'Award of Excellence in Economics' by Columbia State Community College, and excelled also in my Accounting, Math, Statistics, and Philosophy classes. Prepared to take on the challenging yet rewarding career of Software Developer.

Employment History

Sales Rep at La Villa Tortilleria, Franklin, TN

November 2016 - September 2022

Being a small, family-owned business, my responsibilities varied constantly, particularly considering the different services the store provides. However, I dedicated most of my time to:

- Educate customers on the different fees that applied to their intended transactions and help them make the right decision for them.
- Manage cash on every money-wire transaction, as well as balancing the registers both in the middle of the day and at the closing time
- Making sure the customer felt cared for and well attended in the most efficient possible way to decrease in-line waiting time

Teller at Wells Fargo, Franklin, TN

September 2022 - Present

Working at the very front line of a large financial institution, my duties were simple but the responsibilities were big. My everyday tasks were regularly:

- Providing account services and executing customer transactions
- Answering bank-related questions while caring for not sharing sensitive information
- Understanding basic accounting terms and reasoning
- Introducing customers to financial products to which they are eligible and referring them to bankers for all other special requests
